

Fountain 1.0-S

Inexpensive choice for small ponds, recommended maximum pond size: diameter 50 m, depth 2 m

The Fountain 1.0-S fountain is intended for applications that require a lot of showiness. The device weighs only 25 kg and is easy to move. Fountain 1.0-S is equipped with a single-phase motor, so it can be connected to the electricity grid anywhere. Unlike other Waterix devices, the Fountain 1.0-S does not contain a suction pipe and has a submersible motor. In addition to visibility, Fountain 1.0-S aerates and forces the water to move.

- Good efficiency
- Low energy consumption
- Does not require extensive infrastructure
- Small initial investment
- Easy to install and maintain
- Flexible capacity increase
- Motor 1.0 kW
- Water flow 23 l/sec
- Water flow 82 m³/h
- Weight with floats 25 kg
- Shower diameter 7.0 m
- Shower height 3.2 m
- Estimated price of electricity consumption €3.5/day

Because of its small size, Fountain 1.0-S is well suited for small and medium-sized ponds. The areas of use are the proximity of your own beach and the ponds of parks and golf courses. It is possible to equip the Fountain 1.0-S with lights, which gives the aerator an impressive appearance.
